

TAMSHELL

Experience the value of real experience.

OVER
25
YEARS OF
EXCELLENCE

Tamshell Corp.

ISO 9001:2000
AS9100 Certified

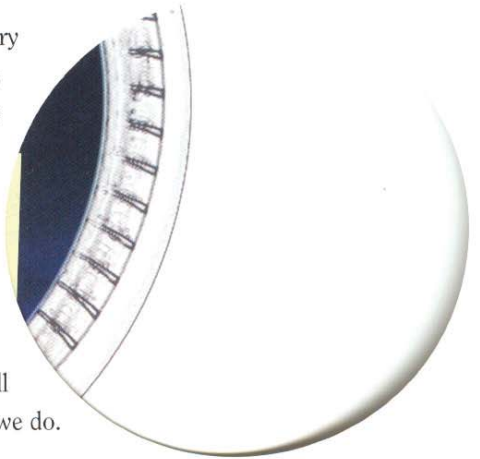

Experience the value of real experience.

With over 22 years of experience, Tamshell has built a reputation as the acknowledged leader in the precision machining of advanced-engineered polymers. Today Tamshell is also carving a reputation in the design and manufacturing of Spring Energized and PTFE Rotary Lip Seals.

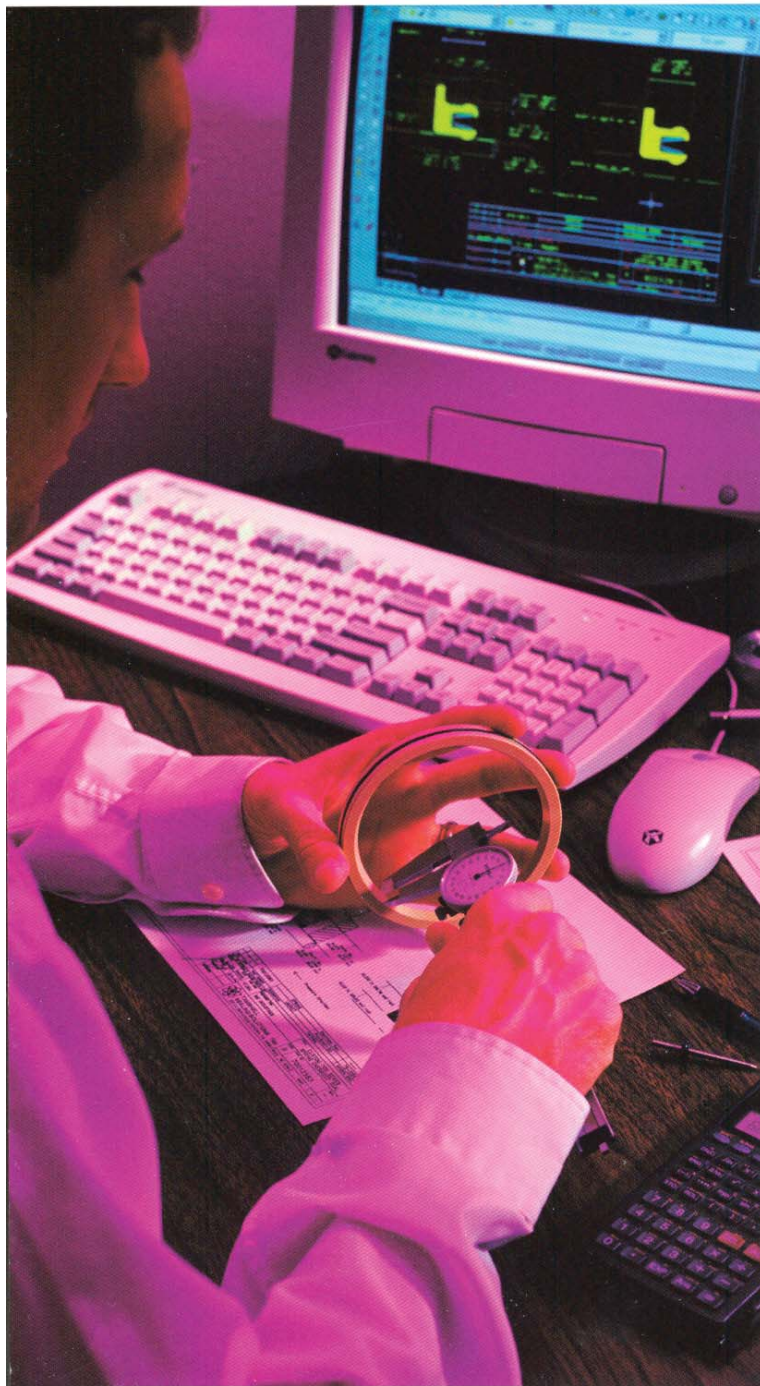

"Give it to Tamshell, they'll figure it out."

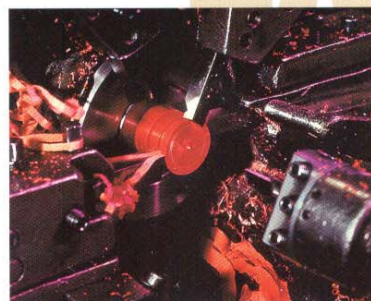

People in the industry know that if there is a complex challenge that seems impossible to most, in terms of size requirements, tolerances, or sheer engineering knowledge, Tamshell can handle it. And we do.

Tamshell's extensive engineering capabilities, the sheer diversity of the materials we use, and our experience create a clear advantage for our customers in terms of time and cost savings, while maintaining the highest quality standards in the industry.

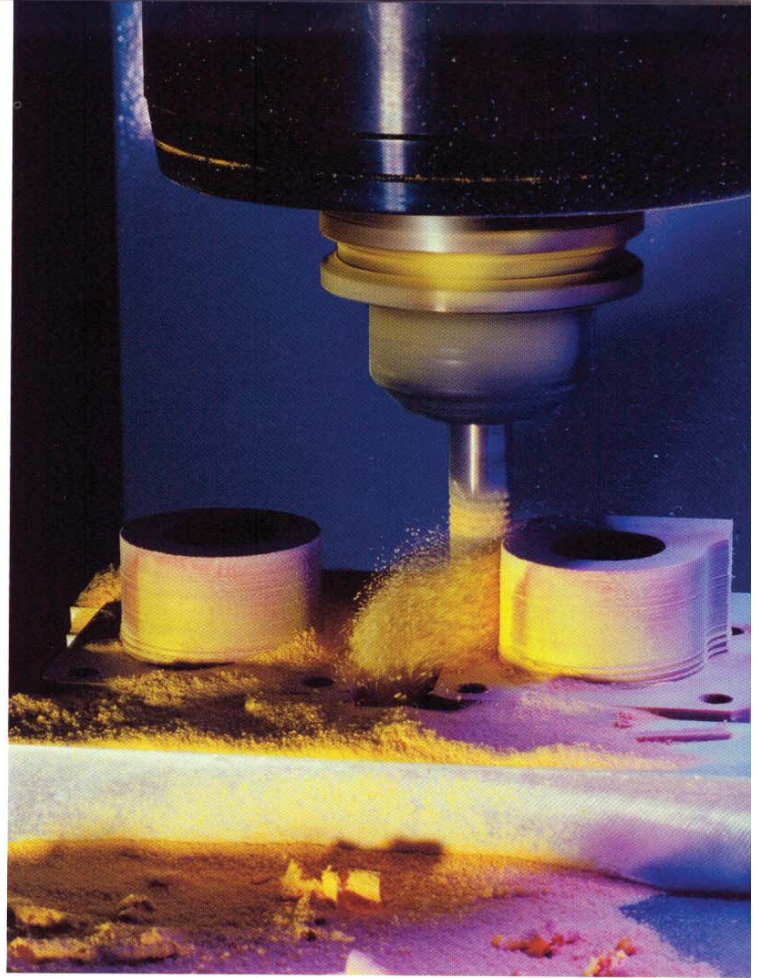

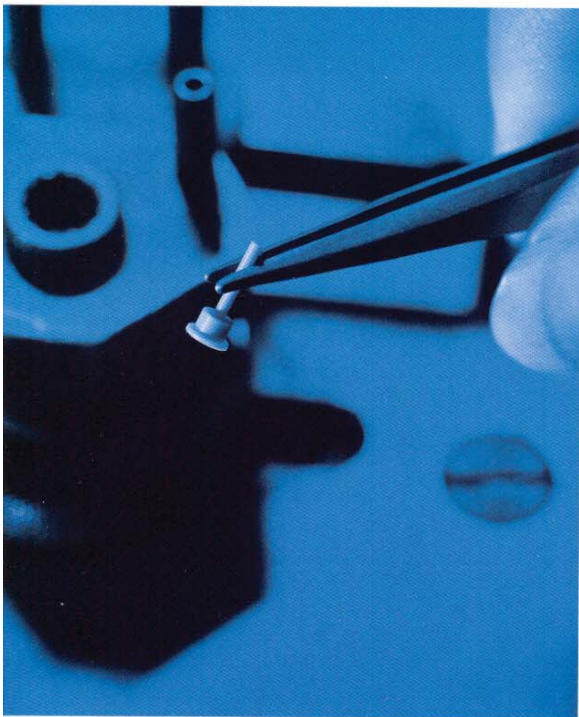

Experi

The material edge.

Tamshell's extensive experience of advanced-engineered polymers includes a wealth of knowledge in raw materials. Understanding the exact nature and characteristics requires hands-on knowledge that only time can teach.

Besides our experience, over time we have built relationships with manufacturers such as Quadrant and Dupont. Working directly with companies like these, we can provide timely material property data and assist with material selection. These relationships also help us maintain a competitive price advantage over the competition.

Attracting the best in the business.

Tamshell attracts the best and most experienced craftsmen in the business. Each machining department head has multiple years of advanced polymer experience. Because of the wide variety of projects and materials they work with, our craftsmen are not only highly motivated, they are highly interested in what they're doing.

ence

The Tamshell difference.

- < Over 20 years of experience
- < Complete contract manufacturing
- < People and experience to handle the "impossible"
- < Superb communications with our customers
- < State-of-the-art equipment, staying on top of the technology
- < Quotes within 1-2 days in most cases
- < Wider range of part sizes
- < Tamshell project group stays on top of the job from bid to delivery
- < Top management involved all the way
- < On target for ISO certification
- < Secondary operations available
- < Order over the internet
- < We will stock product
- < KanBan and Just-in-time delivery available
- < We build long term relationships
- < We give every customer a fast, dependable and accurate response

Our own jacket material.

Our extensive knowledge of materials allows us to match the right material to the specific need dictated by the application. The many options available include our own line of jacket material—Polyshell®.

If it's polymer, come to Tamshell.

Tamshell has worldwide capabilities with customers all over the globe. Like all of our customers, they have come to rely on our ability to do the seemingly impossible and still deliver quality products on time and within budget.

Service

There's a definite advantage experience and knowledge bring to polymer machining. We are dedicated to using that advantage to deliver the highest quality parts at the best value no matter what the challenge.

Experience the value only experience can bring.
